All About Fish

You can find fish in many different types of water. Fish can live in freshwater or saltwater. Fish can also live in brackish water which is a mix between fresh water and salt water. Fish do not breathe air and they do not have lungs.

Instead of lungs, fish have gills. Fish can be lots of different colors. They can be all colors of the rainbow.

Fish are cold-blooded animals. Their body temperature changes as the temperature of the water changes.
